

I DO NOT want LPFM stations to be given priority over current FM translator services. K-LOVE radio serves me and my community by offering constant encouragement to its listeners. When someone is encouraged, he/she wants to encourage or be kind to someone else. This has far-reaching ramifications not only for a community at-large, but also for communities within the community- places of business, schools, etc. K-LOVE also promotes the kind of basic character values we all want EVERYONE ELSE to live by when it affects us or our family. To silence this kind of positive influence is to send the message that good character is not important- what a foolhardy example to send the residents of a community. Such disparagement of character spreads through a community like a slow-growing cancer, leaving the residents pining for "the good ol' days".
